- (57) Sammendrag:
The present invention relates to a disposable sink mat 100 with integral cord. The disposable sink mat 100 is configured to accumulate waste during dishwashing or while utilizing sink to prevent clogging in the sink. The disposable sink mat 100 is further configured to provide collection and disposal of waste accumulated in the sink mat 100 in a convenient and sanitary fashion. The disposable sink mat 100 comprises a body portion 102 having at least four corners 110 and exterior edges 108 extending from the body portion 102, at least one cord element 106 that extends laterally from at least one corner 110. The cord element 106 is configured to be pulled outwardly by a user for gathering the at least four corners 110 and exterior edges 108 inward to a closed position to form a closed bag.
