- (57) Sammendrag:
A waste filtering apparatus 100 made of PVC material used for sewage treatment plant is disclosed. The waste filtering apparatus 100 comprises an elongated body 102, wherein the elongated body 102 includes an open upper end 104, and a closed lower end 106. The open upper end 104 is configured to receive a sewage. The waste filtering apparatus 100 includes a plurality of holes 110 disposed along the elongated body 102. The plurality of holes 110 is configured to permeate liquid waste present in the sewage. The solid waste is retained in the lower end 106 of the elongated body 102, thereby reducing the blockages due to solid waste in the sewage treatment plant.
